

Scenario 2: Student makes Chancellor’s List but still receives “SAP academic probation warning”

Semester 1

BIO 1801 (4 hours) W
CHE 1101 (3 hours) W
CHE 1110 (1 hour) W
PHL 1501 (3 hours) W
PSY 1200 (3 hours) W

For this 14-hour semester, the student withdrew from all classes and therefore has no grade point average. Next semester, all of these hours will STILL BE INCLUDED as attempted hours in the SAP calculation.

Semester 2

BIO 1801 (4 hours) A
PHL 1501 (3 hours) A
PSY 1200 (3 hours) A-
UCO 1200 (3 hours) A

Total attempted hours (both semesters): 27

Total passed hours (this semester): 13

At the end of this second 13-hour semester, the student now has 27 total attempted hours and a grade point of average of 3.93 and is named to the Chancellor’s List.

However, even though the student was NOT on academic probation, he/she will still receive a “SAP academic probation warning.” Why? Because this semester the student has only passed 48.1% of his/her overall attempted hours: $13 \div 27 =$ SAP ratio of 48.1% (below the required 67%).

Semester 3

BIO 1802 (4 hours) B
CHE 1102 (3 hours) A
CHE 1120 (1 hour) WC (dropped, still counts as attempted hours)
HON 1515 (3 hours) A
PHL 2000 (3 hours) A
R C 1000 (3 hours) A

Total attempted hours (all three semesters): 44

Total passed hours (this semester): 16

At the end of this third 17-hour semester, the student now has 44 total attempted hours and a grade point of average of 3.93 and is named to the Chancellor's List.

However, even though the student is NOT on academic probation, he/she will still receive a "SAP academic probation warning." Why? Because this semester the student has only passed 65.9% of his/her overall attempted hours: $29 \div 44 =$ SAP ratio of 65.9% (still below the required 67%).
